

Experimental Storm tracks Diagnostic Discussion
Valid: February 9, 2006

Synopsis:

.... 1-2 sentences summarizing the important points

Review and Assessment:

... Description of the tracks during the past two weeks and their relationship to the leading modes of climate variability → ENSO, AO, PNA, MJO, etc.

Week 1 and 2 Outlook:

.... Description of what the next two weeks may bring

.... Based on changes in the leading patterns of climate variability, ensemble GFS and CFS forecasts, and monitoring of tropical convection (MJO weekly update, global hazards)
